PRESS RELEASE

Hellenic Cadastre has made the following announcement:

The Cadastre Survey enters its final stage:
“Check, confirm, correct”
Postal of Cadastral Survey in Municipalities of
Amfipoli, Visaltia, Emmanouil Pappas and Nea Zichni
in the Central Macedonia

On Wednesday, April 17, 2019, the Posting of Cadastral Data starts in the Kallikratis Municipalities of a) Amfipoli, b) Visaltia, c) Nea Zichni, d) pre-Kapodistrias local authorities of: Agio Pnevma, Valtotopi, Dafnoudi, Emmanouil Pappas, Mesokomi, Metalla, Monovrysi, Neos Skopos, Neo Souli, Paralimni, Pethelinos, Pentapoli, Toumpa, Chryso, Psychiko of Kallikratis Municipality of Emmanouil Pappas of the Regional Unit of Serres of the Region of Central Macedonia.

To better serve rightholders, excerpts from the Cadastral Tables and Charts have been sent to them by post to the contact address declared by each citizen.

Through Posting, owners of real property are able to check that their ownership is registered and correct any errors. This process ensures that the cadastral survey will be completed properly and there will be no problems in the subsequent operation of the Cadastre.

Therefore, at this stage the participation of citizens is essential in order to avoid unnecessary trouble in the future.

After completion of Posting, including the submission and examination of correction requests / complaints and the corresponding correction in cadastral tables, the final cadastral data and the Initial Registrations of the Cadastre are produced, and the Cadastral Survey Office starts to operate in this area instead of the Land Registry Office.
Electronic Posting of cadastral survey

When posting begins, rightholders will also be able to see data relating to them electronically through the Cadastre website www.ktimatologio.gr at the e-KTIMATOLOGIO Online Services portal.

The rightholders can see the details of Posting either by using the security codes of taxisnet applications or after creating (if this has not already been done) their personal Cadastre code and entering the "three keys" included in the declaration receipt. If taxisnet codes are used, they will see all properties of the regions which are posted and linked with their TIN.

The online submission of the application for the correction of Personal data is also supported through the special "Posting application" at the “Cadastre” section of Online Services. The three "keys" to access this service are: Declaration Registration Number, Personal Code Number and Property Code Number, which are recorded on the Submission of Declaration receipt.

Temporary Cadastral Charts and Temporary Cadastral Tables will be posted at the Cadastral Survey Offices and will remain posted for two (2) months from April 17, 2019.

Anyone with a legitimate interest may make an application to correct or appeal against posted data at the competent Cadastral Survey Office within two (2) months of the above date. For expatriates and the Greek State the deadline is four (4) months.

In particular, for the application for correction of a manifest error, the submission deadline is until May 4, 2020. Until the same date, overdue declarations may also be submitted.
