PRESS RELEASE

Hellenic Cadastre has made the following announcement:

**The Cadastre Survey enters its final stage:**

**Extension of Posting of Cadastral Data in areas of the R.U. of Kozani in the region of Western Macedonia**

By decision of the Board of Directors of Hellenic Cadastre, the deadline for submission of correction requests and appeals against the Temporary Cadastral Charts and Temporary Cadastral Tables is extended **until Monday, August 26, 2019 for expatriates** and the Greek State, in the following local authorities:

A) In the Kallikratis Municipality of VOIO
B) In the Kallikratis Municipality of SERVIA-VELVENTOS
C) In the Pre-kapodistrian LRAs of: Anarrachi, Anatoliko, Ardassi, Asvestopetra, Vlasti, Galateia, Drosero, Emporio, Ermakia, Kardia, Karyochori, Komanos, Komnina, Mavropigi, Mesovouno, Milochori, Pentavryso, Pteleonas, Pyrgoi, Spilia and Foufas of the Kallikratis Municipality of EORDAIA.

In particular, for the application for correction of a manifest error, the submission deadline is until **March 10, 2020.** Until the same date, overdue declarations may also be submitted.

To better serve rightholders, excerpts from the Cadastral Tables and Charts have been sent to them by post to the contact address declared by each citizen.

Through Posting, owners of real property are able to check that their ownership is registered and correct any errors. This process ensures that the cadastral survey will be completed properly and there will be no problems in the subsequent operation of the Cadastre.

Therefore, at this stage **the participation of citizens is essential in** order to avoid unnecessary trouble in the future.
After completion of Posting, including the submission and examination of correction requests / complaints and the corresponding correction in cadastral tables, the final cadastral data and the Initial Registrations of the Cadastre are produced, and the Cadastral Survey Office starts to operate in this area instead of the Land Registry Office.

Electronic Posting of cadastral survey

When posting begins, rightholders will also be able to see data relating to them electronically through the Cadastre website www.ktimatologio.gr at the e-KTIMATOLOGIO Online Services portal.

The rightholders can see the details of Posting either by using the security codes of taxisnet applications or after creating (if this has not already been done) their personal Cadastre code and entering the "three keys" included in the declaration receipt. If taxisnet codes are used, they will see all properties of the regions which are posted and linked with their TIN.

The online submission of the application for the correction of Personal data is also supported through the special "Posting application" at the “Cadastre” section of Online Services. The three "keys" to access this service are: Declaration Registration Number, Personal Code Number and Property Code Number, which are recorded on the Submission of Declaration receipt.

For information:
Call from Monday to Friday from 08:30 AM to 3:30 PM at 210-6505600 and visit the website www.ktimatologio.gr
